

RESTART

TIME

Lamarty TIME is a collection of decors with a set of combinations, variations and trends that complement each other and emphasize the features of the interior creating its own style and special nature.

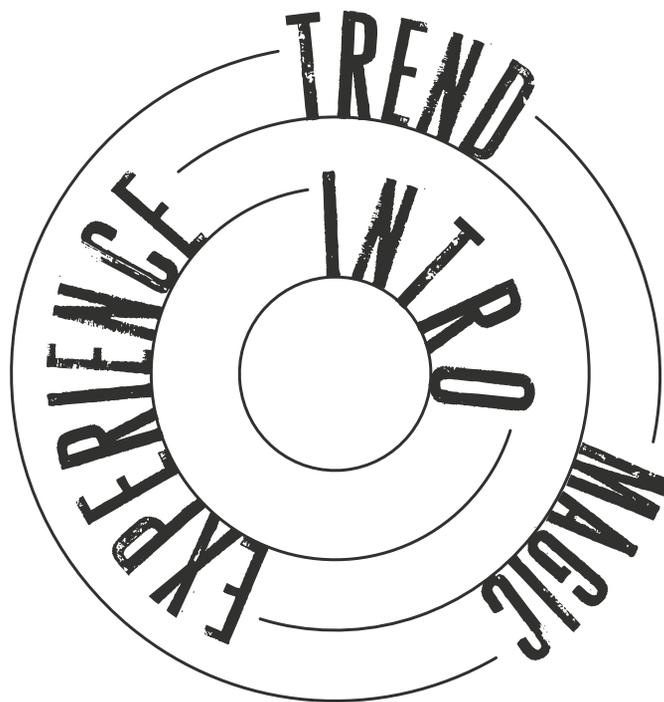

Time does not tolerate restrictions. Each of its shapes transforms easily. Time imperceptibly flows from one state to another, at times erasing all boundaries.

The new TIME collection embodies the mobility and independence of such states of time. There are no limits, no borders, only a sense of presence in the space and everyone feels it in its own way.

It is always difficult to predict what the world will be like in the future. You can certainly rely on the opinion of creative industry professionals — they are able to feel changes long before others can realize them. It's fascinating to see how environmental factors will affect our not-so-distant future.

MAGIC

THE NEW REALITY

Augmented reality is one of the main themes of the future: automation, robotics, eSports, artificial intelligence, neural networks and other smart technologies. This world tends to be spontaneous, cosmic and experimental. The idea of parallel universes existence is gradually coming to people's minds, where the physical world is intertwined with the virtual world. This craving for the unknown affects the surroundings.

EXPERIENCE

THE UNIQUE EXPERIENCE

Seeking inspiration can take us not only a few decades but also a few centuries back. More and more modern artists find their own way, being inspired by the classics. Traditional values are popular because of the association with something familiar, sustainable and safe. All these concepts gain a new meaning in a rapidly changing world. The EXPERIENCE concept reminds us of past eras. This experience is important to us, even though in a modified and adapted form, fitting gently into the context of a modern interior.

CREATING THE INTERIOR, TRUST YOUR EXPERIENCE AND KNOWLEDGE

FOR ALL THE LIFE CHANGES YOU NEED TO STOP. HAVE SOME REST. TAKE A BREATH.

People talk a lot about efficiency. We try to be energetic and create more time in a day. We rush at a breakneck speed from soaring to new heights, satisfy our ambitions, pursue the goals which generate new ones. In this race, there is no time to understand the value of things around us.

TO TAKE A BREAK DOES NOT MEAN TO STOP...

The philosophy of the TIME Collection implies a mindful attitude to our time. No rush, no fuss, look toward the past and think about the future.

We've got a gift from the universe. This gift is the ability to take a break in present-day developments. Don't be afraid as it's a great opportunity to look at them from a different angle.
